

Press Release

Bringing innovation to the UAE's Estate Management solutions

Provis Launches Innovative Multi-Functional Estate Management Application

Abu Dhabi, 24 March 2020 – Provis, one the UAE's leading estate management companies, announced the launch of its latest innovation the "Provis Application" as part of its efforts to enhance the real estate journey and experience. Available for Provis managed communities' property owners and tenants, the iOS and Android application provides users with easy to use and convenient functionality to manage their properties remotely using their smart-phones and tablets.

HP Aengaar, Provis CEO, said, "We are delighted to introduce the Provis App for unit owners and tenants across our managed communities. Prop-tech has been an integral part of Provis since we launched last year, and we have been ensuring that anything we introduce can have a real tangible benefit to our customers. Following the launch of the Provis Portal last year, this Application represents another key milestone in our digital transformation journey which promises to use the power of technology and innovation to enhance our unique service proposition and add value to the real-estate sector and experience."

The Provis App allows owners and tenants to access a full suite of online services that include reviewing their personal information, viewing financial statements and payment history of community related expenses, making online payments, uploading and downloading documents, booking services or maintenance requests, viewing and booking community amenities such as classes or events, reporting any issues within their communities or units and much more.

Last year, Provis was launched by Aldar Properties to disrupt the estate management sector in the UAE. Provis provides property management consultancy and management, owners'

association consultancy and management, sales & leasing and clubhouse and lifestyle management services. The estate management firm has since won numerous contracts across varying commercial and residential properties and today manages over 29,000 units across both property management and owners' association management and has sold and leased thousands of properties across the Emirates.
